

Chemical and Biomolecular Engineering

Request Academic Credit for CBE 599 Master's Independent Study

CBE 599 Independent Study can be a valuable enhancement allowing the pursuit of a specific topic of interest not available in regularly offered courses. If you are interested in doing independent study, the first task is to formulate an idea for the project. Then find a professor in a related field who thinks it is a worthwhile program and will take the responsibility of supervising the project. The **Independent Study Advisor** will provide guidance and take ultimate responsibility for your grade.

Independent study projects are limited to 2 courses units and receive a letter grade.

Possible extension can be provided (990) if Thesis completion will be the following semester.
